**Mendeley - A Last.fm For Research?**

Authors: V. Henning, J. Reichelt

Journal: 2008 IEEE Fourth International Conference on eScience

Year: 2008

Volume:

Issue:

Pages:

**Abstract:**

This paper aims to explore how the principles of a well-known Web 2.0 service, the world's largest social music service "Last.fm" (www.last.fm), can be applied to research, which potential it could have in the world of research (e.g. an open and interdisciplinary database, usage-based reputation metrics, and collaborative filtering) and which challenges such a model would face in academia. A real-world application of these principles, "Mendeley" (www.mendeley.com), will be demoed at the IE...

# Adding Document

Import your references from BibTeX, Endnote, RIS or Zotero

Year: 1998

Volume: 3

Issue: 2

Pages: 127-39

**Abstract:**

Over the past few years novel folding mechanisms of globular proteins have been proposed using minimal lattice and off-lattice models. The factors determining the cooperativity of folding in these models and especially their explicit relation to experiments have not been fully established, however.

# Web Importer

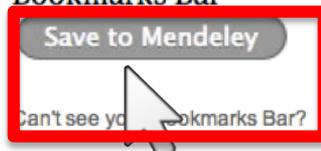

— web에서 검색된 서지 및 PDF 파일을 바로 저장

– <http://www.mendeley.com/import/>

– Save to Mendeley를 브라우저의 북마크 혹은 즐겨찾기에 설정 (오른쪽 마우스 혹은 drag&drop 방법)

## How it works

1. Drag the "Save To Mendeley" button to your Bookmarks Bar

2. Find an article

Search for articles in a wide variety of sites, such as those listed below.

3. Click the "Save to Mendeley" bookmark

Click the **"Save to Mendeley"** bookmark you just created, and the article details will display on the right hand side of the page.

4. Review the details and Save

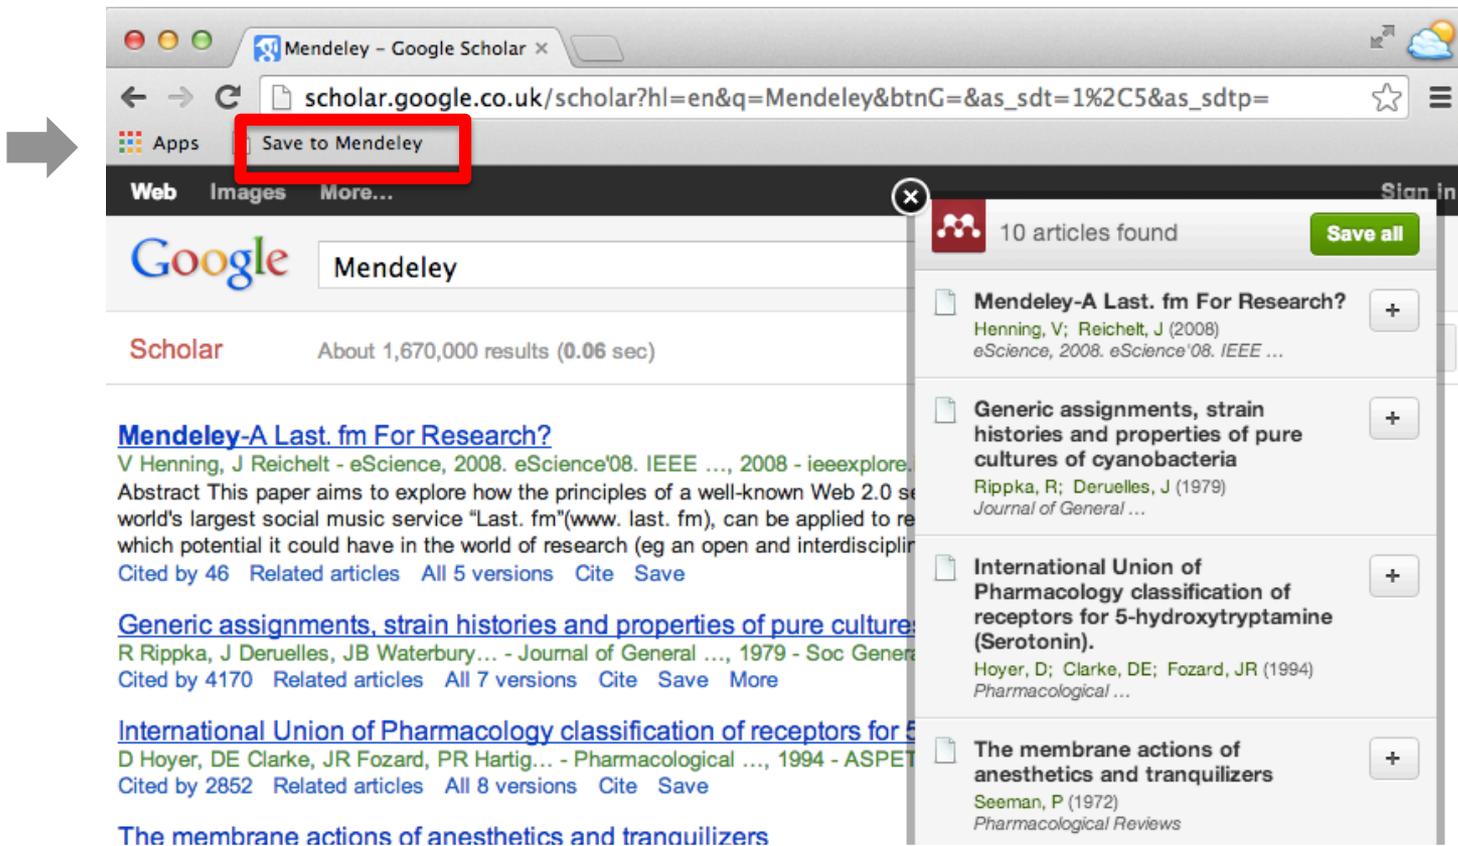

If the details look ok, click the "Save" button.

Next time you sync Mendeley Desktop, any newly saved articles will appear in the "Recently Added" section.

# Using the Web Importer

검색 결과 화면에서 북마크 해놓은 “Save to Mendeley”를 클릭하여 Mendeley에 반입

The screenshot shows a web browser window with a Google Scholar search for 'Mendeley'. The search results are displayed on the left, and a Mendeley web importer overlay is shown on the right. The overlay displays '10 articles found' and a 'Save all' button. The search results include:

- Mendeley-A Last. fm For Research?** by Henning, V; Reichelt, J (2008). *eScience, 2008. eScience'08. IEEE ...*
- Generic assignments, strain histories and properties of pure cultures of cyanobacteria** by Rippka, R; Deruelles, J (1979). *Journal of General ...*
- International Union of Pharmacology classification of receptors for 5-hydroxytryptamine (Serotonin).** by Hoyer, D; Clarke, DE; Fozard, JR (1994). *Pharmacological ...*
- The membrane actions of anesthetics and tranquilizers** by Seeman, P (1972). *Pharmacological Reviews*

**Perspective**

**Why Full Open Access Matters**

Michael W. Carroll\*  
American University, Washington, D.C., United States of America

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

Getting open access right matters because the new publishing model is designed to increase the pace and impact of scientific communication through the power of the Internet. Immediate, free publication increases the audience for scientific research and overcomes the increasingly high price barrier to access imposed by the traditional.

is to shift from a model that uses copyright to control reuse of content to one that uses copyright to encourage republication, preservation, and translation.

**Why Support the Open-Access Financial Model?**

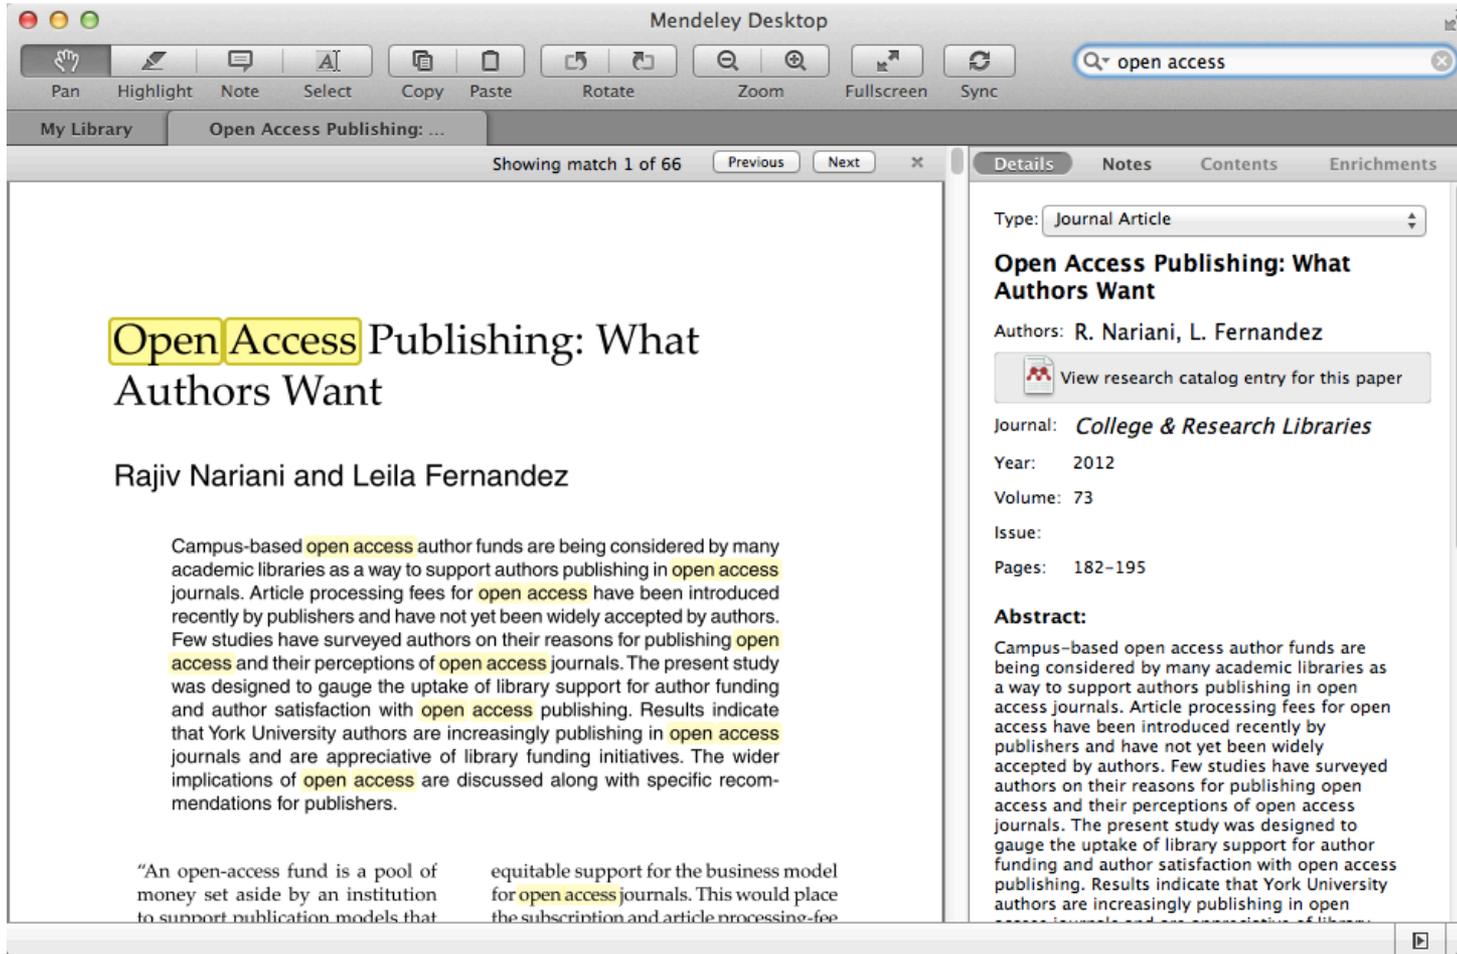

Pricing of traditional, subscription-financed scientific journals is highly inefficient. The growth in digital technologies and in digital networks should be driving down the price of access to the scholarly journal literature, but instead prices have increased at a rate greatly in excess of inflation (e.g., [4,5]). Moreover, studies from journal publishing in some disciplines show that commercial journal publishers successfully charge significantly more than non-commercial journal publishers, such as scholarly societies, even when the commercial offerings make less valuable contributions to the progress of science and knowledge as measured by citations (e.g., [6]).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The tradi-

their demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

# Read and Work in the PDF Viewer

The screenshot shows the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The menu bar includes "Pan", "Highlight", "Note", "Select", "Copy", "Paste", "Rotate", "Zoom", "Fullscreen", and "Sync". A search bar at the top right contains the text "open access". Below the menu bar, there are tabs for "My Library" and "Open Access Publishing: ...". The main content area displays a PDF document with the title "Open Access Publishing: What Authors Want" and authors "Rajiv Nariani and Leila Fernandez". The text in the PDF is highlighted in yellow. On the right side, there is a sidebar with tabs for "Details", "Notes", "Contents", and "Enrichments". The "Details" tab is active, showing the following information:

Type: Journal Article

**Open Access Publishing: What Authors Want**

Authors: R. Nariani, L. Fernandez

[View research catalog entry for this paper](#)

Journal: *College & Research Libraries*

Year: 2012

Volume: 73

Issue:

Pages: 182-195

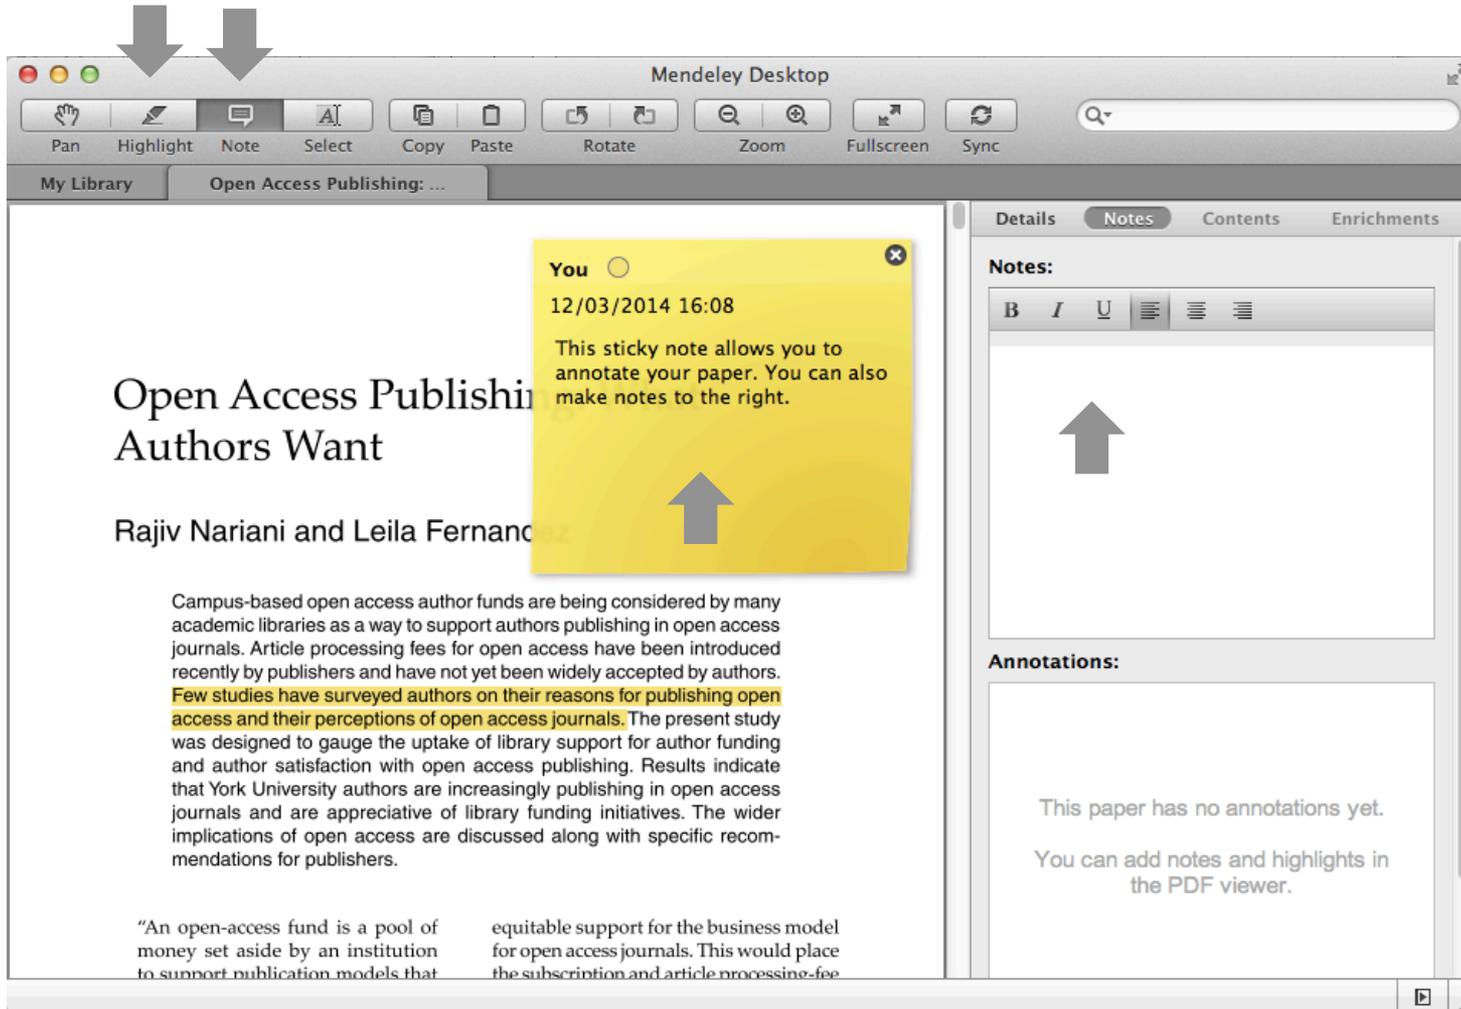

**Abstract:**

Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals. The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

“An open-access fund is a pool of money set aside by an institution to support publication models that equitable support for the business model for open access journals. This would place the subscription and article processing-fee

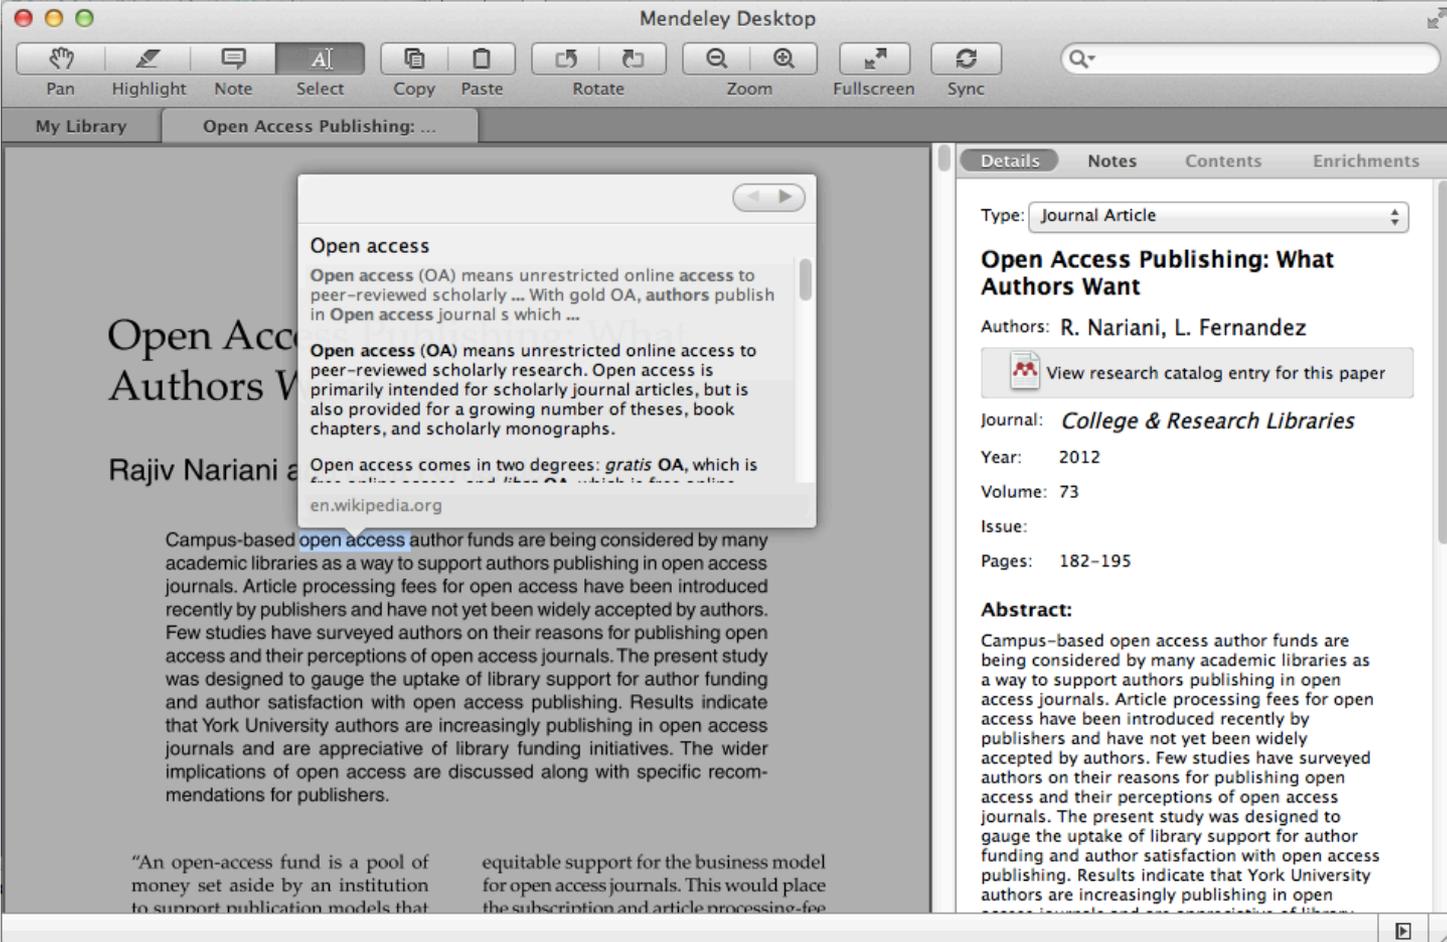

# Annotate and Highlight

The screenshot displays the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The menu bar includes "Pan", "Highlight", "Note", "Select", "Copy", "Paste", "Rotate", "Zoom", "Fullscreen", and "Sync". The main content area shows a document titled "Open Access Publishing Authors Want" by Rajiv Nariani and Leila Fernandez. A yellow sticky note is overlaid on the document, containing the text: "You 12/03/2014 16:08 This sticky note allows you to annotate your paper. You can also make notes to the right." The right sidebar is active, showing the "Notes" tab. The "Notes" section is empty, with a large upward-pointing arrow. The "Annotations" section contains the text: "This paper has no annotations yet. You can add notes and highlights in the PDF viewer." The document text includes a highlighted sentence: "Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals." The bottom of the document shows a quote: "An open-access fund is a pool of money set aside by an institution to support publication models that equitable support for the business model for open access journals. This would place the subscription and article processing fee..."

# Look Up Term Definitions

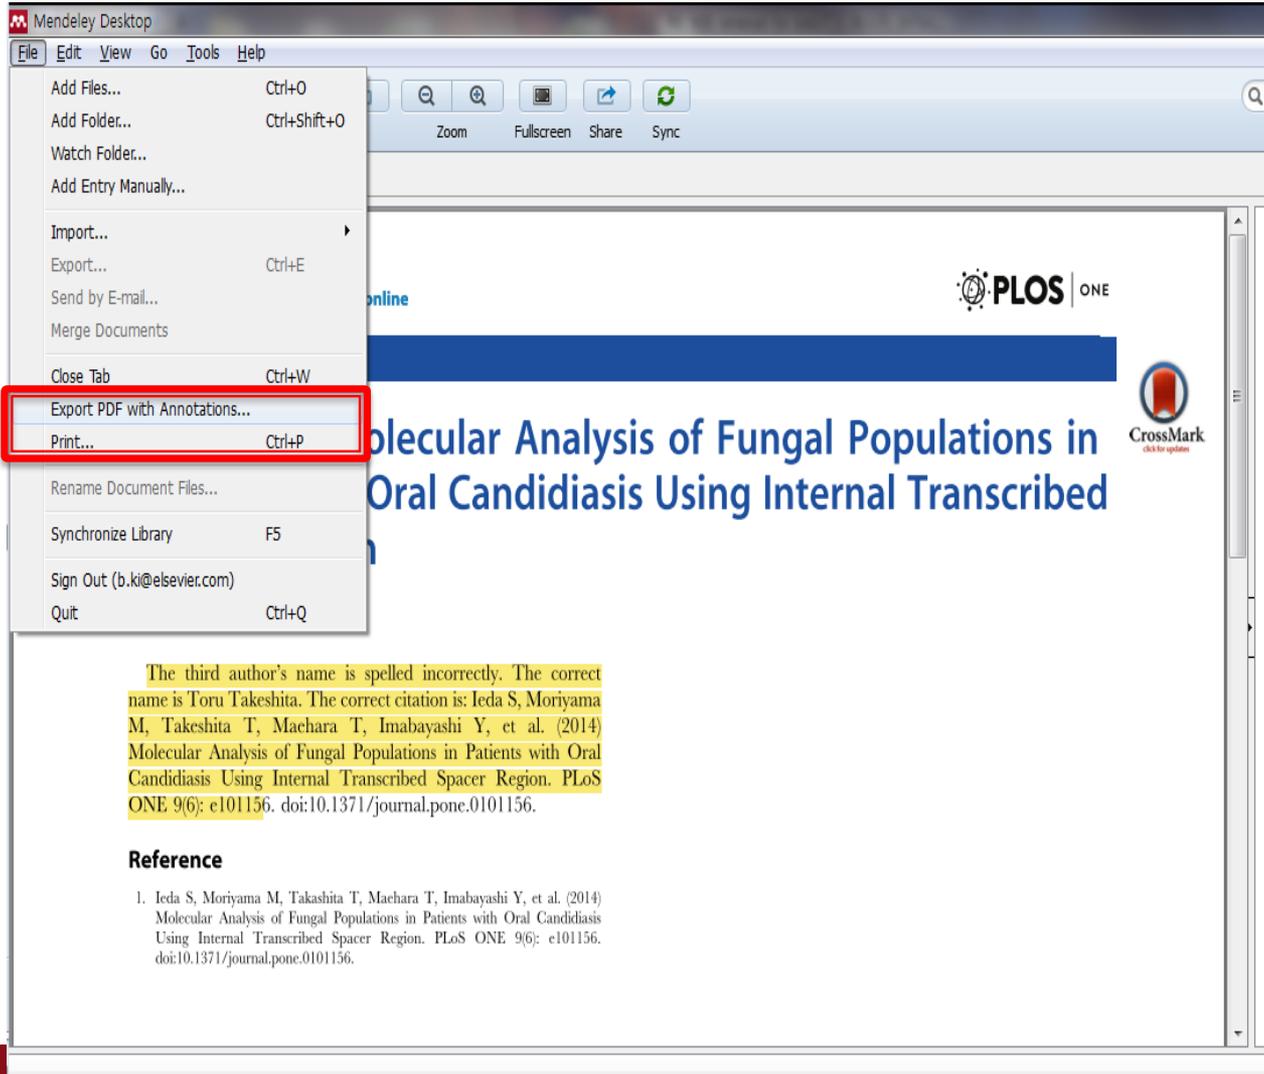

The screenshot shows the Mendeley Desktop application window. The main document area displays a PDF page with the title "Open Access Publishing: What Authors Want" by Rajiv Nariani and L. Fernandez. A tooltip is visible over the text "Open access (OA) means unrestricted online access to peer-reviewed scholarly research. Open access is primarily intended for scholarly journal articles, but is also provided for a growing number of theses, book chapters, and scholarly monographs." The tooltip also includes a link to "en.wikipedia.org".

The right-hand panel shows the "Details" tab for the selected document. It includes the following information:

- Type: Journal Article
- Open Access Publishing: What Authors Want
- Authors: R. Nariani, L. Fernandez
- Journal: *College & Research Libraries*
- Year: 2012
- Volume: 73
- Issue:
- Pages: 182-195
- Abstract: Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals. The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

# Read PDF in Mendeley Web Library

The screenshot shows the Mendeley Web Library interface. On the left, there is a sidebar with navigation options: MY LIBRARY (All Documents, My Publications, Favorites, Trash), FOLDERS (Betty, Elsevier Work, English), and GROUPS (Betty's Elsevier, Betty's Mendeley, Bioengineering@KA..., Certification Program, Elsevier Korea, Pragmatic, TEST). The main area displays a list of documents with columns for checkboxes, stars, document icons, titles, authors, journals, and dates. One document is selected and highlighted in blue.

The selected document is: **European management and European business schools: Insights from the history of business schools** by **Kaplan A** in *European Management Journal* (2014). The date is 2 Apr.

On the right, a preview of the PDF document is shown, displaying the title and author information. Below the Mendeley interface, a browser window shows the PDF viewer for the same document, with the URL: [www.elsevier.com/library/viewer/?fileId=00095cb3-f893-5507-3d76-3e46f4c2cfc](http://www.elsevier.com/library/viewer/?fileId=00095cb3-f893-5507-3d76-3e46f4c2cfc). The browser also shows the Elsevier logo and the journal title: **European Management Journal 32 (2014) 529–534**.

**ARTICLE INFO**

Article history:  
Available online 13 April 2014

**Keywords:**  
Business schools  
Cross-cultural management  
European management  
History  
Interdisciplinarity  
Societal management

**ABSTRACT**

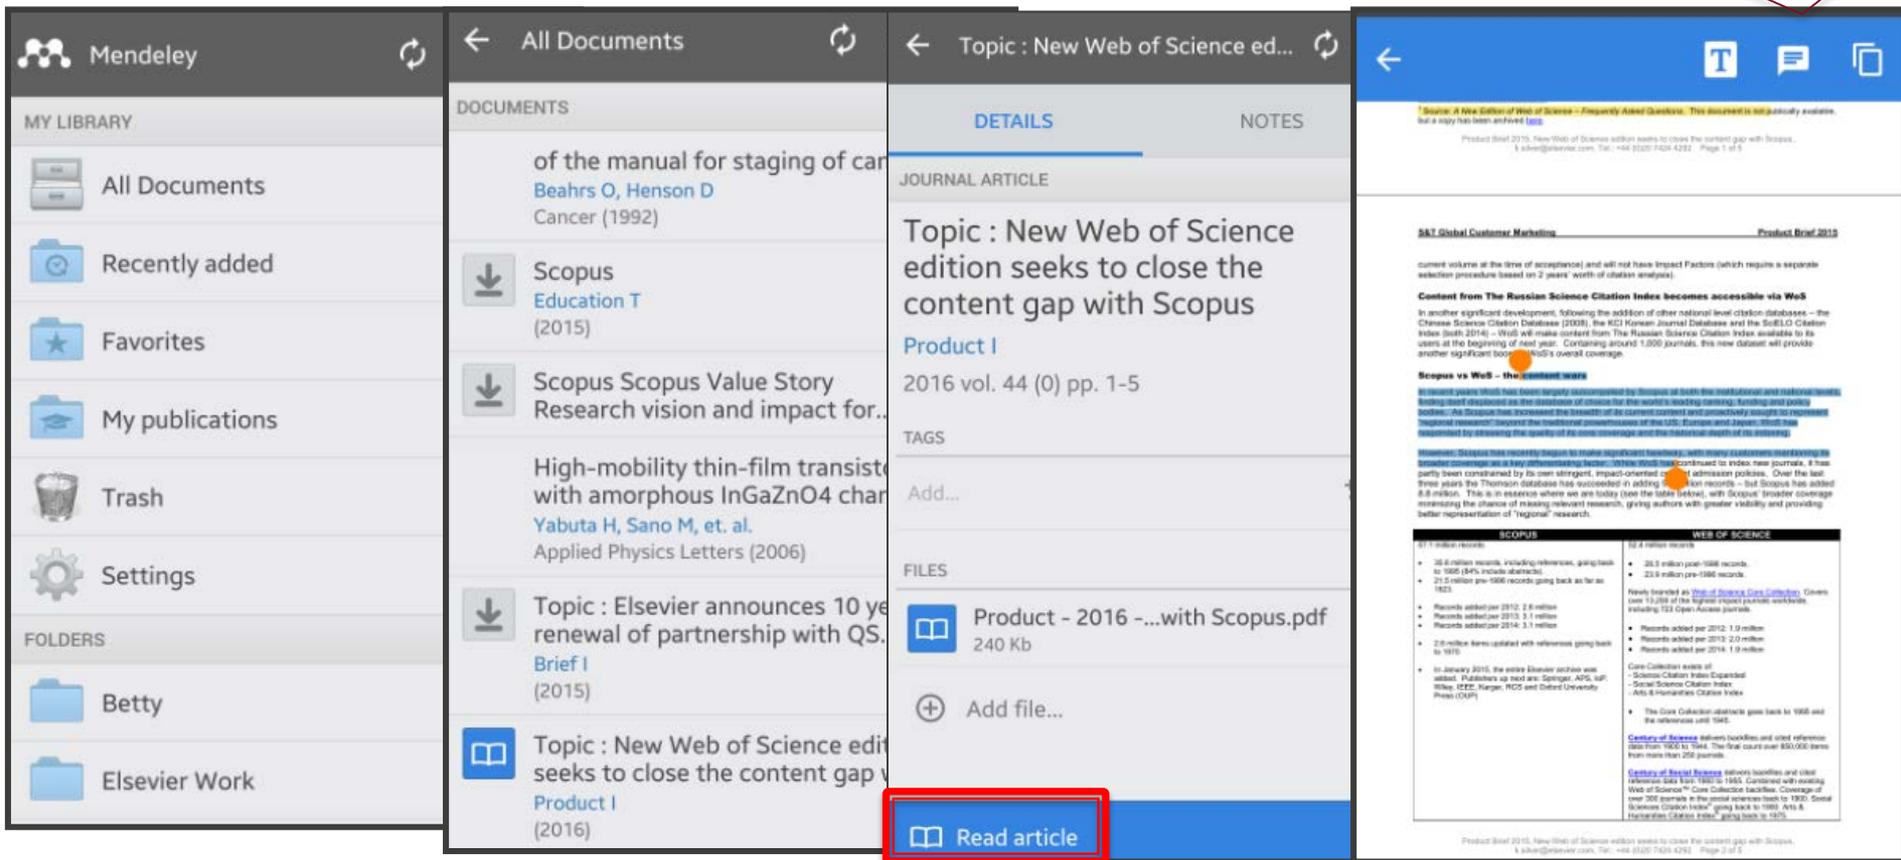

This article looks at the history of business schools and identifies specific characteristics that are common to European management schools. On the basis of these characteristics, European management is subsequently defined as a cross-cultural, societal management approach based on interdisciplinary principles. In a final step, a closer look is taken at how European business schools should prepare their students for the unique European management context. It is suggested that such schools should provide courses on cross-cultural management and courses explaining the interdependencies between the private and public sector, offer students opportunities to experience other cultures over the course of their studies, and teach management from an interdisciplinary and practically-oriented perspective.

### Discipline summary

Biology is the study of life. It attempts to understand the structure, function, processes and evolution of living organisms and how they relate to their environment. Modern biology covers a wide variety of fields and is highly interdisciplinary, drawing on advances in areas such as computer science, mathematics, psychology. Because biology is such a broad subject, it is subdivided according to the ...

# Private Groups

The screenshot shows the Mendeley interface for a private group named "Certification Program", owned by [Giovanna Bartens Sibille](#). The group is currently in the "Overview" tab, with "Documents" and "Members" tabs also visible. A text input field at the top prompts the user to "Ask a question or comment here". Below this, a list of activity items is displayed:

- susan wei** commented: "Private group can share papers and notes, but public groups are only for creating reading lists." (1st March)
- Nikhil Joshi** added a document: "Signal Processing Toolbox" (28th January)
- Erika Hernández Macías** added a document: "Donor evaluation in heart transplantation: The end of the beginning." (4th December, 2014). A comment from **masato takaishi** is visible: "likes this."
- Nikhil Joshi** added a document: "Library Budget Predictions for 2015 Results from a Telephone Survey May-July 2014" (22nd October, 2014)

The left sidebar shows a list of groups, including "Betty's Elsevier", "Betty's Mendeley", "Certification Pro...", "TEST", "Bioengineering@KA...", "Elsevier Korea", "ETRI J", and "Pragmatic". Below the groups list is a search filter labeled "Filter by Author Key" with a dropdown menu.

# The CSL Editor

— 기존 스타일을 기반으로 원하는 스타일로 편집 가능한 open site

The screenshot shows the Visual CSL Editor interface in a web browser. The browser address bar displays `editor.citationstyles.org/visualEditor/`. The page has a dark navigation bar with tabs for "About", "Search by name", "Search by example", "Visual editor" (selected), and "Code editor". A "feedback" button is visible on the right. Below the navigation bar, there are dropdown menus for "Style" and "Edit", and the current style is identified as "American Psychological Association 6th edition".

The left sidebar contains several sections:

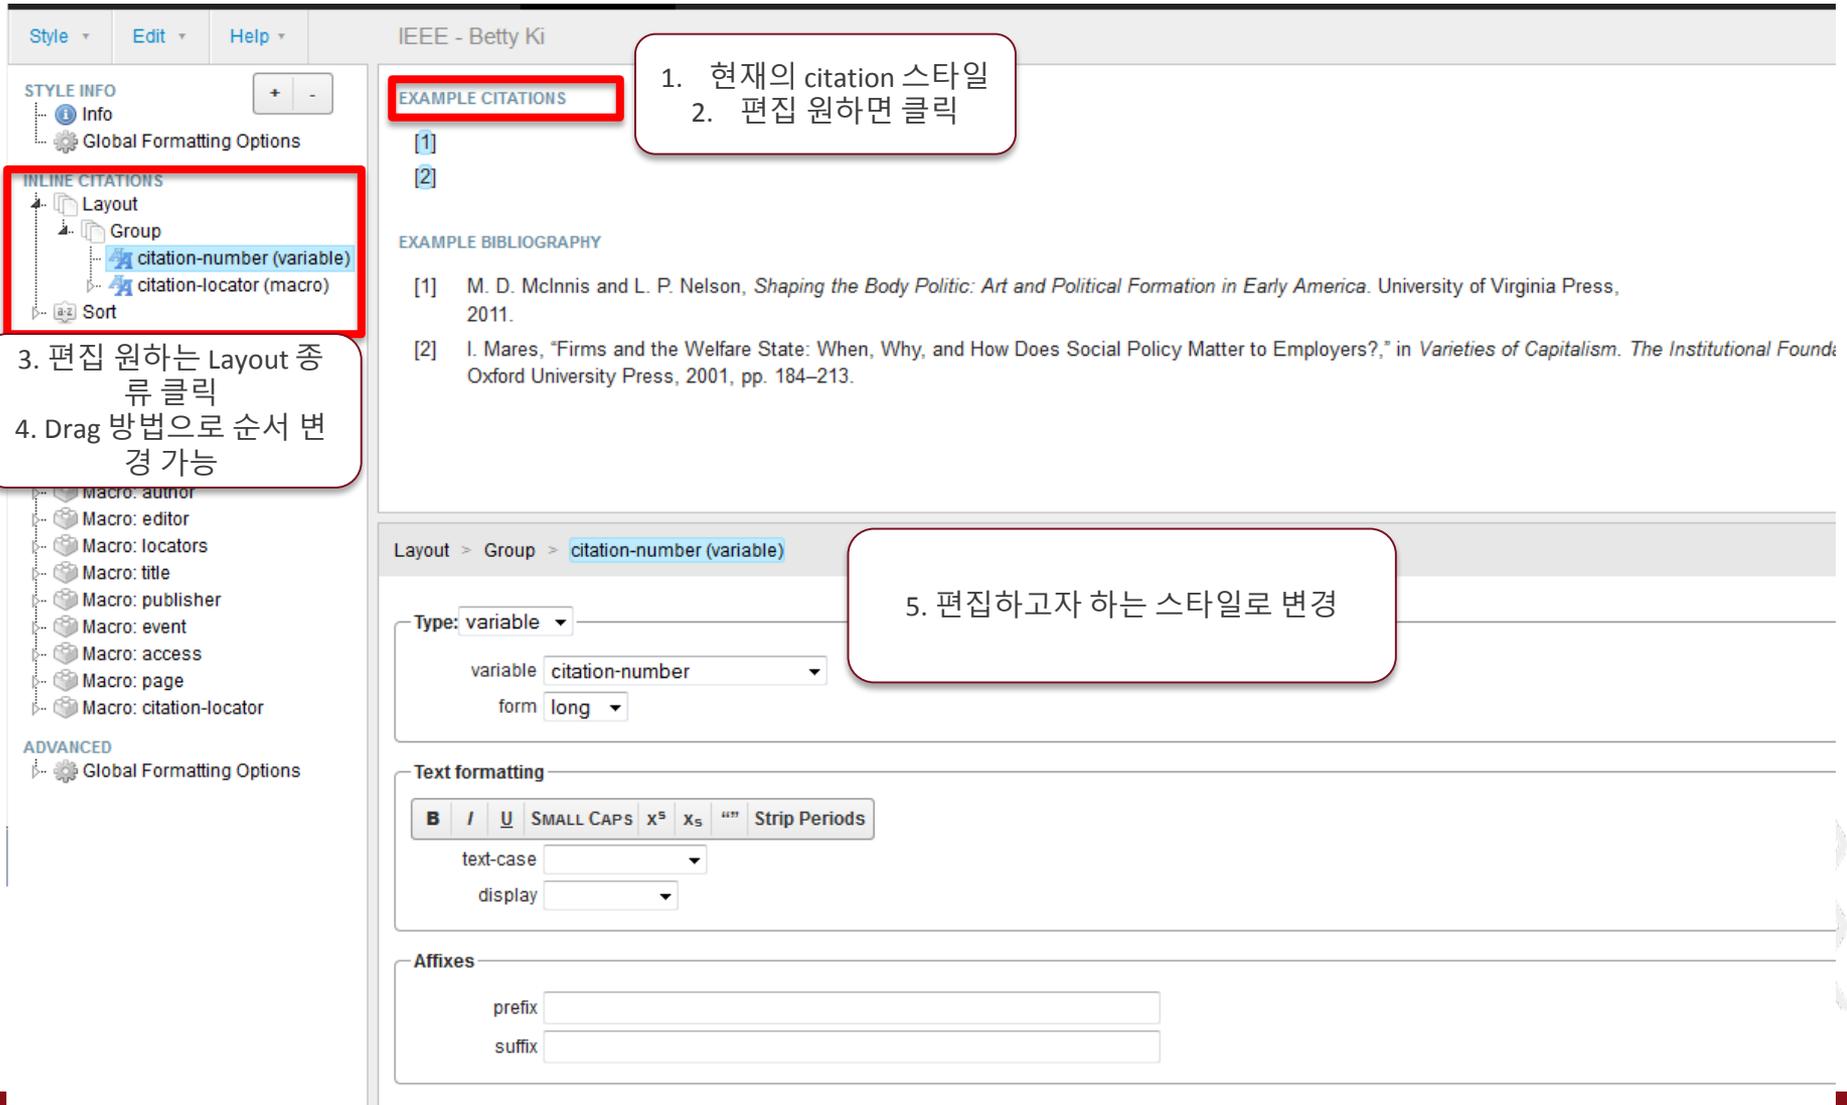

- STYLE INFO**: Includes an "Info" link and "Global Formatting Options".
- INLINE CITATIONS**: Includes "Layout" and "Sort" options.
- BIBLIOGRAPHY**: Includes "Layout" and "Sort" options.
- MACROS**: A list of macro types such as "Macro: container-contributors", "Macro: secondary-contributors", "Macro: author", "Macro: author-short", "Macro: access", "Macro: title", "Macro: publisher", "Macro: event", "Macro: issued", "Macro: issued-sort", "Macro: issued-year", "Macro: edition", "Macro: locators", "Macro: citation-locator", "Macro: container", and "Macro: container-title".
- ADVANCED**: Includes "Global Formatting Options".

The main content area is divided into three sections:

- EXAMPLE CITATIONS**: Shows two examples: "(Accadia et al., 2012)" and "(McInnis & Nelson, 2011)".
- EXAMPLE BIBLIOGRAPHY**: Shows two full citation examples:
  - Accadia, T., Acernese, F., Alshourbagy, M., Amico, P., Antonucci, F., Aoudia, S., ... Astone, P. (2012). Virgo: a laser interferometer to detect gravitational waves. *Journal of Instrumentation*, 7(03), P03012–P03012. doi:10.1088/1748-0221/7/03/P03012
  - McInnis, M. D., & Nelson, L. P. (2011). *Shaping the body politic: Art and political formation in early america*. Charlottesville, VA: University of Virginia Press.
- Info**: A form for editing the style's metadata:
  - Title: American Psychological Association 6th edition
  - Title (short): APA
  - ID: <http://www.zotero.org/styles/apa>
  - Summary: (empty)
  - Rights: This work is licensed under a Creative Commons Attribution-ShareAlike 3.0 license
  - Published: (empty)
  - ISSN: (empty)
  - eISSN: (empty)

At the bottom of the "Info" section, there is an "ISSNs" label and an "Add ISSN" button.

– 사이트에 접속하여 “Search by name” 혹은 “Search by example”로 스타일 찾아 편집

## 1. Find a style

### Search by name

If you're looking for a style like APA, Harvard, etc... just use the search box at the top of the page to search for a style name, or journal title.

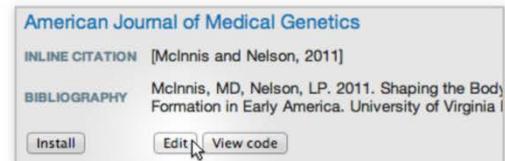

### Search by example

If you don't know the name of the style, but know what the final citation should look like, you can use our [search by example](#) tool to find styles that most closely match.

## 2. Edit the style

If you can't find a style that quite suits your needs, find one that's a pretty close match and click the "Edit style" button to open that style in the [visual editor](#).

## 3. Use the style

Once you've found a style that's suitable for you to use, simply click the "Install" button on the search results, or "Save" a style you've edited, to use it in your reference manager.

## CSL Editor

Use Mendeley's CSL Editor to modify and create citation style languages - allowing you to style your citations and bibliography to your precise requirements. [view all guides →](#)

---

**Introduction**

[View](#) [Edit](#)

- 01. An overview of the CSL Editor
- 02. Editor layout
- 03. Making changes to a style
- 04. Example - Modifying 'et al' usage
- 05. Example - Removing DOI
- 06. Saving and installing your modified style
- 07. Sharing your style

### What is the CSL Editor?

The citation style language (CSL) editor is a powerful tool hosted by Mendeley which allows you to quickly and easily modify a citation style. Citation styles control the way in which your references appear in a document you author using the [Mendeley Citation Plugin](#). Mendeley provides access to nearly 7000 citation styles which already exist, however you may want to tweak a style to meet your own requirements.

Although the CSL Editor provides an intuitive interface, citation styles are complicated. As such, the CSL Editor should be regarded as one of the more advanced aspects of using Mendeley. This guide will explain some basic actions that can be undertaken, as well as providing an introduction to tackling more sophisticated objectives.

The CSL initiative is a cross-platform program designed to standardise citations in a format which can be used by multiple applications. Mendeley supports and contributes to this open-source project.

### Who should use the CSL Editor?

Although the CSL Editor allows for very sophisticated modifications to styles, the majority of users only use it to make minor additions or cosmetic changes. You may find it easier to follow one of the sets of specific step-by-step instructions that we've provided in this guide.

This guide is not intended to be an exhaustive set of documentation for the CSL Editor. If you have a specific question that you need assistance with, please [contact our support team](#).

If you believe you've come across an error in an existing style and would like to get it resolved, you can [contact the CSL Project Team using this form](#).

**Why full open access matters**

Authors: M. Carroll

[View research catalog entry for this paper](#)

Year: 2011

Pages:

**Abstract:**  
This perspective explains the mechanics of copyright and scholarly publishing and warns authors who support open-access publishing about a new pseudo open-access publishing model in which authors pay but publishers still retain commercial reuse rights.
