

Preserve your most
valuable resource — time —
with PatentPak™.

PatentPak is a workflow solution that can save up to 50% of the time spent acquiring and searching through multiple patents to find vital chemistry.

- Instantly and securely access searchable PDFs of patents from 31 major patent offices – no more wasting time navigating multiple patent websites
- Rapidly track down hard to find chemical information within patents with direct links to substance locations identified by CAS scientists
- Locate patents in languages you know through CAS global patent family coverage
- Conveniently browse and evaluate important chemistry and explore new research angles with a unique custom patent viewer

PatentPak – the only patent workflow solution of its kind – available in SciFinder® and STN®.
